Our Reliable
Data Security Solutions

We help establish mature governance processes that define roles, responsibilities, and operating procedures.

Our *Approach*

- Review policies and requirements to formulate coherent security strategies
- Perform system-wide reviews of business processes and strategic decision-making
- Analyze platforms, tools, and architectures to ensure that systems are both compliant and truly secure

Our *Impact*

- Better compliance with industry standards and federal regulatory requirements
- Highly mature and responsive governance processes
- Greater efficiency and reduced redundancy of effort
- Increased awareness of security attacks and potential breaches

Our *Expertise*

- Regulations (e.g., CMS and ONC rules, HIPAA, ITAR, and HEDIS)
- Plans of Action and Milestones (POA&M)
- Security Incident and Event Managers (SIEMs)
- Risk Management Frameworks (e.g., NIST)
- Authority to Operate (ATO) processes
